Dr Arpit Bansal

MBBS, MS, FMAS

Head of Advanced Laparoscopy Surgical Oncology and Bariatric Surgery Departments

Jeevan Jyoti Hospital, Prayagraj

Forbes Celebrity

drapritbansal@gmail.com

Trained in Robotic and Colorectal Surgery from Portsmouth Hospital UK Dr Arpit Bansal is an IBMS (International Board of Medicine and Surgery) certified surgeon- a certificate issued by US-based agency to the finest surgeons and doctors worldwide. As an accomplished advanced laparoscopy cancer and bariatric surgeon Dr Arpit Bansal started advanced laparoscopy cancer surgery at Jeevan Jyoti Hospital on a large scale at nominal cost in Prayagraj region so that patients get maximum relief and that they are not forced to go to higher centres in Delhi and Mumbai for costly treatment. At this young age Dr Arpit Bansal has successfully operated some very complicated cases and saved life of many patients at Jeevan Jyoti Hospital. Dr Arpit Bansal started advanced laparoscopy cancer surgery at Jeevan Jyoti Hospital on a large scale at nominal cost in Prayagraj region so that patients get maximum relief and that they are not forced to go to higher centres in Delhi and Mumbai for costly treatment. Dr Arpit Bansal has received training under some of the finest surgeons in India including Dr Shailesh Puntambekar who did India's first successful uterine transplant surgery.

Just like his celebrity parents and founder of Jeevan Jyoti Hospital late Dr AK Bansal and Dr Vandana Bansal, Dr Arpit considers patient care and quality of treatment the utmost. Due to which he started laparoscopy surgery to treat cancers of stomach, colon, gall bladder, ovarian, uterus cancer, cervix etc so that the patient's hospital stay is minimized and they face reduced risk of infection. It is because of his dedication and efforts that Jeevan Jyoti Multi Hospital is fast becoming the leading centre of advanced laparoscopy and cancer surgery. According to Dr Arpit Bansal the other benefits of laparoscopy cancer surgery is that the blood loss and complications is minimum, healing time is fast, less pain, less cost-and the patients need to be made aware of it.

He routinely performs laparoscopy surgeries to treat cancers of stomach, colon, gall bladder, ovarian, uterus cancer, cervix etc so that the patient's hospital stay is minimized, they face reduced risk of infection, blood loss and have quick recovery. He has successfully performed bariatric surgeries of people suffering from morbid obesity at the hospital. His experienced hands laparoscopically removed a large tumor (12X10 cms size) from the uterus of woman weighing 145 kgs. The woman was made to walk within four hours of the surgery. He has assisted in over 100 Laparoscopic gastro-intestinal oncosurgery cases.

Taking Risks

Dr Arpit Bansal could have settled in some easy and high-paying specialties in medicine. But I chose to take up advanced laparoscopy cancer surgery, besides some other complicated surgeries, as I wanted to work for the cancer patients. The very name Cancer creates panic in the mind of patients. I wanted to provide them some quality care in their own city. It was very challenging. But I am committed to provide the latest technology and treatment options to cancer patients. I want to create awareness that timely detection improves the chances of complete cure, he shares.

Times of India's Icon of Health Award by the Deputy Chief Minister Dinesh Sharma in a glittering ceremony in Lucknow on 26th April 2018 for outstanding contribution in the IVF and advanced infertility treatment.
Hon'ble Health Minister Shri Siddharth Nath Singh presented "Icons in Health" award of Times Group on 23rd April 2017.
