[Forbes Celebrity](#)

Years Completed in Profession

Active since 1992

A veteran in women's medicine, Dr Vandana Bansal is a leading gynecologist, IVF expert and laparoscopic surgeon of India. Dr Vandana Bansal is the Director of Jeevan Jyoti Hospital in Prayagraj (Allahabad). She has appeared in the world-famous magazine 'Forbes' India Shining Marquee edition (<http://www.forbesindia.com/article/india-shining/arpit-test-tube-baby-center-bringing-stateofheart-ivf-facilities-to-uttar-pradesh/55429/1>) as Contributors of Modern India personalities. Dr Vandana Bansal is also the co-author of a guide-cum-motivational book titled 'Life Begins At 50' which she co-authored with her husband (late) Dr AK Bansal- who was one of the finest laparoscopic surgeons of India. An eminent expert of assisted reproduction techniques (ART), Dr Vandana Bansal pioneered the practice of advanced infertility treatment in the region. She was amongst the handful of experts who introduced hysteroscopic surgery for infertility and uterine disorder treatment in Uttar Pradesh much earlier. She is known for introducing some trending facilities like social egg-freezing at Jeevan Jyoti Hospital for cancer-stricken women and ladies who want to delay pregnancy. Dr Vandana also introduced facilities that increase pregnancy rates, besides IMSI, surrogacy, embryo, egg banking and other modern infertility treatment and solutions for hundreds of childless couples. As a result of her relentless efforts in pushing the boundaries of medical innovation Dr Vandana Bansal's IVF patients now come from Dubai, Botswana, US, UK etc. besides metro cities of India like Delhi and Mumbai to get world class treatment under her supervision. Dr Vandana Bansal is committed to establish Jeevan Jyoti Hospital and Arpit Test Tube Baby Centre as the leading medical tourism hub of eastern UP.

Dr Vandana Bansal, with the support of her husband (late) Dr AK Bansal, established eastern UP's first state-of-art IVF facility in the region--Arpit Test Tube Baby Center—in Prayagraj (Allahabad) way back in 1999. Recognizing Dr Vandana Bansal's innovative medical practice which is way ahead of time, Incredible India Foundation and Corporate Council for Leadership and Awareness conferred the prestigious 'Iconic IVF Unit of The Year Award 2017' on Arpit Test Tube Baby Centre of Jeevan Jyoti Hospital, Prayagraj for providing the latest and the most advanced infertility treatment facilities under one roof. Nearly one-and-a-half dozen IVF centres/hospitals in different states across the country were nominated for this prestigious award in this category. Dr Vandana Bansal received this national award from Santosh Kumar Gangwar, Minister of State for Labor and Employment (Independent Charge) Government of India during the Indian Industry and Entrepreneur Summit 2017 held at Hotel Ashoka in Delhi on September 19, 2017. She has made significant contributions to the field of infertility and IVF and advanced gynecology treatment during the last three decades.

Dr Vandana is the epitome of women empowerment. She has provided employment to hundreds of employees in her hospitals over the years. Majority of these employees are women belonging to different age groups. Dr Vandana Bansal has hogged the limelight on the popularity chart of medical practitioners in the field of IVF and

Test Tube Babies since 1999. Her achievements have been appreciated and recognized by prestigious medical authorities in India and abroad.

A Gold Medalist from Allahabad University for her PhD in IVF, Dr Vandana Bansal is probably the first gynecologist in the North Eastern region to have produced a commendable thesis of this nature in the field of medicine. Her commitment as a philanthropist goes far beyond the four walls of the hospitals she is associated with. Dr Vandana Bansal's biographical note finds a pride of place in the coveted book: 'Asia Pacific Who's Who' of Distinguished and Admirable Achievers and Asian Admirable Achievers.'

The first state-of-art IVF facility in the region—Arpit Test Tube Baby Center—was established by Dr Vandana Bansal along with her husband (late) Dr AK Bansal in Prayagraj (Allahabad) way back in 1999. She kept adding feathers to her already ornate cap in the form of Arpit IVF and Infertility Research Center. The fact that Dr Vandana has successfully treated countless infertility cases from India and abroad speaks volumes of her unparalleled contributions to the field of medicine.

Her medical prowess and proficiency have brought countless awards and accolades to Dr Vandana Bansal. She has participated in numerous national and international workshops in the USA, the UK, Singapore, Switzerland, Spain, Germany, UAE etc. Her research papers have been published in reputed national and international scientific journals. She was invited to present her paper at the international conference in South Africa. She is also an active member of Indian Menopause Society. Dr Vandana Bansal's love for nature also reflects in her working style. With numerous indoor plants she has created green corners in the Jeevan Jyoti Hospital which has a soothing effect on the patients and their attendants.

Dr Vandana is totally committed to promoting women's health of all age groups right from adolescence to old age. A prolific writer and poet, she has also organized numerous national and state level workshops/training on infertility, laparoscopy and hysteroscopic surgery in Prayagraj. It is difficult to list all the achievements of Dr Vandana Bansal in such a brief profile. However, here are some of the high spots of her achievements:

Commendable achievements

Arpit Test Tube Baby Centre is renowned for giving to Prayagraj (Allahabad) its first successful test tube baby on 27 November 2000.
